PROFILE

Third-year Business Computing student specializing in Business Intelligence, seeking a PFE internship in Data Science or Artificial Intelligence. Hands-on experience with Python, Pandas, NumPy, SQL, statistics, data cleaning and machine learning, supported by an internship at Tunisie Telecom and paid client projects delivered in 2026.

EDUCATION

Licence in Business Computing – Business Intelligence 2024 – 2027

FSEG Nabeul, Tunisia

Baccalaureate in Computer Science – Honors: Assez Bien 2024

Nabeul, Tunisia

EXPERIENCE

Tunisie Telecom – Application Development Intern July 2026

Nabeul, Tunisia

- Developed a task management application and a workflow management application using the MERN stack and MongoDB.
- Worked across application and database components in a local development environment, both independently and as part of a team.

Paid Client Projects 2026

- Phantom Stickers** | MERN, Supabase: Full-stack e-commerce platform with admin authentication, dashboard, product CRUD and Vercel deployment. Live demo.
- Moto Parts Stock Manager** | Flutter, SQLite, Supabase: Co-developed and delivered a paid inventory management application for a motorcycle parts retailer, supporting mobile and PC use with stock management, notifications, local SQLite storage and Supabase backup.
- Cafément** | Web: QR-accessible digital menu with direct Google review access; developed for client deployment.
- Hotel Amira** | Frontend Web: Developed the frontend of a paid hotel website project according to client requirements.

PERSONAL PROJECTS

Customer Segmentation and Market Basket Analysis 2025

Python, Pandas, NumPy, Scikit-learn, MLxtend, PyQt5

- Cleaned transactional data, performed RFM analysis, applied K-Means clustering for customer segmentation, and used Apriori for frequent itemsets and association rules.
- Built a PyQt5 interface to present analytical results.

Movie Recommender System

Python, Pandas, Scikit-learn, Streamlit

- Built an interactive recommendation application using Pandas and Scikit-learn, with CountVectorizer and cosine similarity for text-based recommendations.

TECHNICAL SKILLS

Data Science / ML: Python, Pandas, NumPy, Scikit-learn, Statistics, Data Cleaning, Exploratory Data Analysis, Machine Learning, RFM Analysis, K-Means, Apriori

Programming: Python, Java, PHP, JavaScript, C, SQL, PL/SQL

Web / Applications: React, Node.js, Express.js, MERN, REST APIs, HTML/CSS, Flutter

Databases / Tools: MongoDB, Supabase, SQLite, Git, GitHub, Linux, Jupyter, Streamlit, PyQt5, Vercel

CERTIFICATIONS

Google Advanced Data Analytics – Google

Google AI Essentials – Google

AWS Cloud Solutions Architect Professional – AWS

LANGUAGES

Arabic: Native **French:** Advanced **English:** Fluent **German:** Beginner (currently learning)
